

Implementing Newsroom Portfolio Website in AEM

Create Header Using OOTB Header Component

1. Navigate to AEM → Sites → WKND (or your project folder).
2. Open the Editable Template (which will be used for all pages).
3. In the Header Section, use the OOTB Header Component.
4. Configure the menu to include:
 - Home
 - News (Dropdown with 5 News Articles)
 - About Me
 - Contact Me
5. Apply custom styling using the ui.frontend folder.

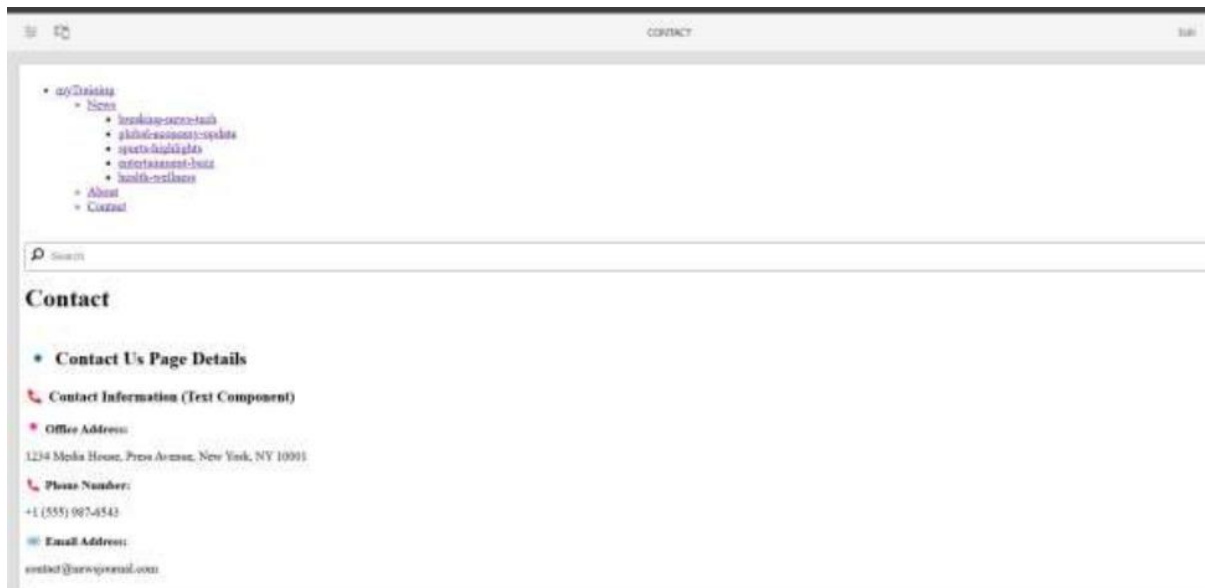

Create Footer with Four Sections

Navigate to AEM → Experience Fragments.

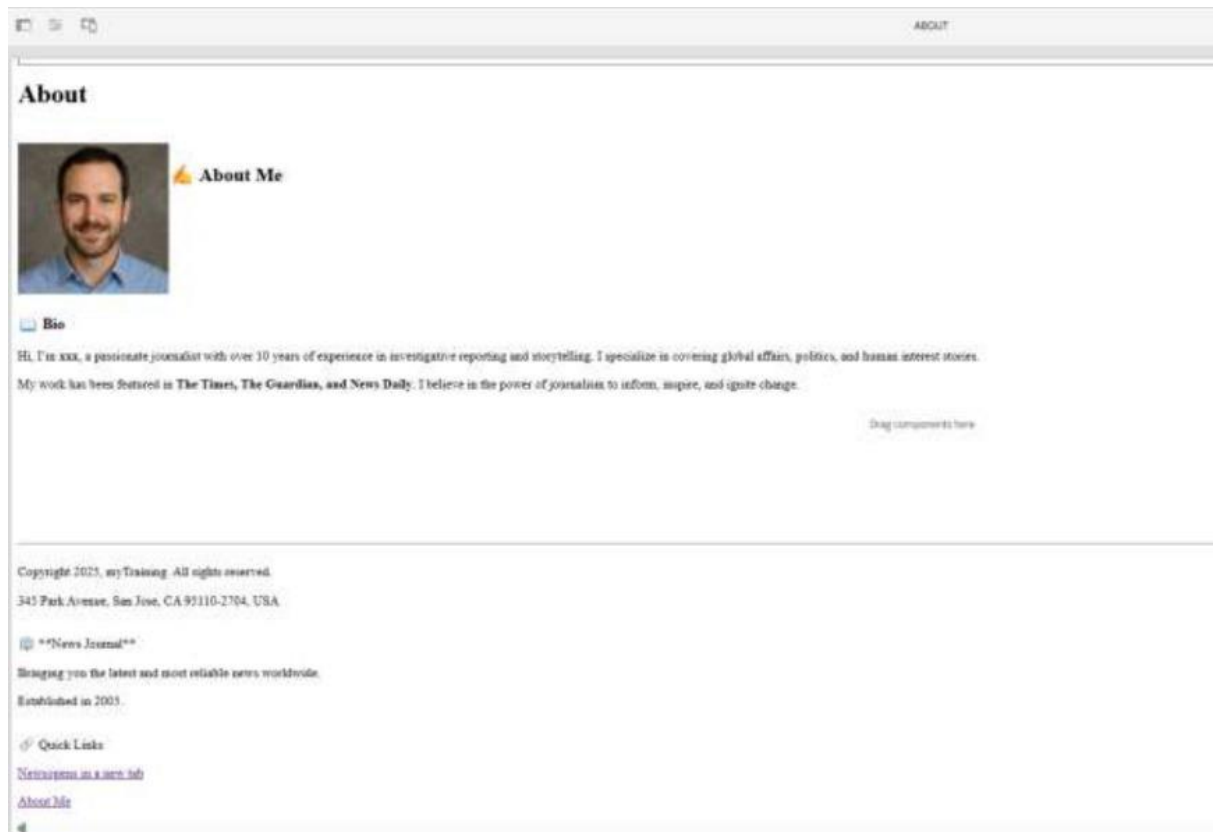

Create a new Footer XF and add the following sections:

- About Me → Use Text Component to describe the journalist.
- Contact Me → Use Text/Teaser Component with Email & Phone.

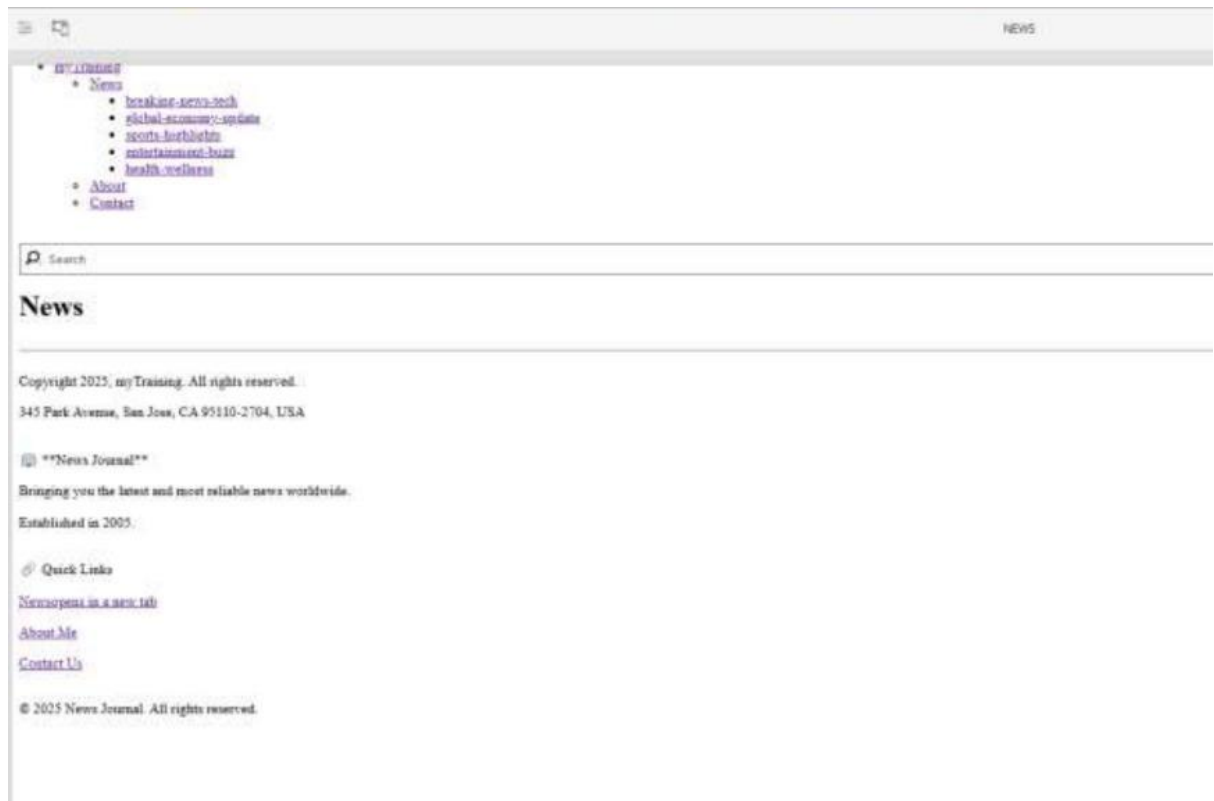

Create News Page Using Newsroom Component

1. Navigate to Sites → Create Page → Newsroom Template.
2. Name it News Page and open the editor.
3. Add a Custom Newsroom Component and set the parent path as /content/news.
4. The component should fetch and display all news articles as cards with:
 - Title
 - News Detail
 - Image
5. Ensure each news article has a unique title, description, and image.

Create News Article Pages Under /content/news

1. Navigate to Sites → Create Page → News Article Template.
2. Create 5 unique news articles under /content/news.
3. Author each page with:
 - Title
 - Image
 - Text Component for Description
4. Ensure that these pages are fetchable by the Newsroom Component.

Create "About Me" Page Using Journalist Component

Navigate to Sites → Create Page → Content Page Template.

Name it About Me and open the editor.

Drag and configure the Journalist Component to include:

- Journalist's Name
- Bio and Achievements
- Image
- Social Media Links

Save & Publish the page.

Create "Contact Me" Page Using Text/Teaser Components

Navigate to Sites → Create Page → Content Page Template.

Name it Contact Me and open the editor.

Add Text or Teaser Components for:

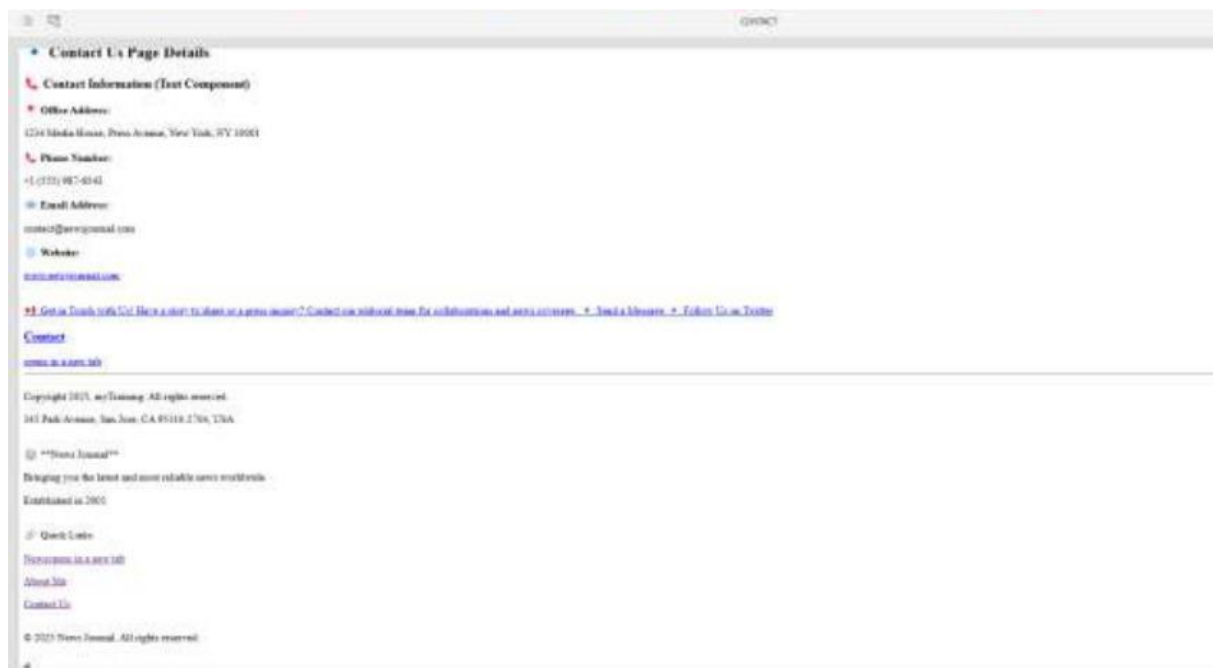

Email Address

Phone Number

Office Address

Social Media Links

Save & Publish the page.

Ensure Header & Footer Are Used at Template Level

Navigate to AEM → Templates → Open Newsroom Template.

Add Header & Footer XF in the Structure Layer.

Save and apply this template to all pages
